

The screenshot shows the dotCMS Site Browser interface. The left sidebar is dark blue with white text, listing various site management options. The 'Browser' option is highlighted in purple, and a red arrow points to it. The main content area is white and displays a folder tree on the left and a table of file assets on the right. The folder tree includes folders like 'about-us', 'application', 'bear-mountain', 'blogs', 'contact-us', 'demos', 'go-quest', 'home', 'images', 'intranet', 'news-events', 'products', 'resources', and 'services'. The table of file assets has columns for Name, Menu, Status, Mod. User, and Mod. Date. The table contains several rows of file assets, including 'Image.jpeg', 'news-details-ng-comments', 'content-geolocation', 'remote-widget', 'rest-content-save', 'One-Pagers', 'containers', 'form-success', and 'mobile-apps'.

Name	Menu	Status	Mod. User	Mod. Date
Image.jpeg			Admin User	11/06/2018 05:42:01 PM
news-details-ng-comments			Admin User	04/14/2015 08:38:50 PM
content-geolocation	5		Admin User	03/09/2015 06:34:06 PM

rest-content-save	2		Admin User	02/10/2015 01:40:18 PM
One-Pagers	3		Admin User	02/05/2015 02:41:50 AM
containers			Admin User	02/03/2015 04:06:11 AM
form-success			Admin User	02/03/2015 04:05:23 AM
mobile-apps	1		Admin User	02/03/2015 04:05:07 AM

From the Site Browser you can easily find, create, and modify folders, File Assets, Pages and Menu Links, and upload File Assets to any folder. For ease of navigation, the Site Browser has been divided into two basic viewing areas: The folder tree which shows a Site's folder directory and a detail area that displays the contents of the selected folder.

The screenshot shows the dotCMS Site Browser interface. On the left is a dark sidebar with navigation options: Home, Site, Browser (highlighted), Links, Templates, Containers, Time Machine, Publishing Queue, Content, Marketing, Types & Tags, Dev Tools, and System. The main area displays a folder tree on the left and a table of content items on the right. A context menu is open over the 'Multi-Containers' folder, listing options: Edit Folder, Delete, Publish (all), Add To Bundle, Mark for Copy, Cut, New, and Close. A red box and arrow point to this menu with the text 'Right-click options on folders'. The table has columns for Name, Menu, Status, Mod\_User, and Mod\_Date.

Name	Menu	Status	Mod_User	Mod_Date
Image.jpeg		✓	Admin User	11/06/2018 05:42:01 PM
news-details-ng-comments		✓	Admin User	04/14/2015 08:38:50 PM
Content Geolocation	5	✓	Admin User	03/09/2015 06:34:06 PM
Remote Widget	4	✓	Admin User	02/11/2015 08:34:12 PM
Content Save	2	✓	Admin User	02/10/2015 01:40:18 PM
Multi-Containers		✓	Admin User	02/03/2015 04:06:11 AM
Form Success		✓	Admin User	02/03/2015 04:05:23 AM
Mobile Apps	1	✓	Admin User	02/03/2015 04:05:07 AM

From either the folder tree or the detail area, you can **right-click on a folder** to display the following options:

- **Edit Folder** - change the name/properties/permissions of a folder
- **Delete** - deletes the folder and ALL of it's contents
- **Publish (all)** - publishes all Pages and files that are currently unpublished in the selected directory and all it's subfolders
- **Push Publish** - adds the folder or object to the push publishing queue - *Not used on our site*
- **Add To Bundle** - adds the folder or asset to a Bundle for push publishing - *Not used on our site*
- **Copy** - creates a duplicate copy of the folder, subfolders, Pages and files that can then be pasted into another directory or the root folder of a host.
- **Cut** - allows the folder to be transferred or “pasted” into another folder. If the paste option is not chosen, the original folder and it's contents will remain in their current folder
- **New** - select this option to create a new folder, Page, upload an image or file, upload multiple files, or create a Menu Link inside the selected folder

The screenshot shows the dotCMS Site Browser interface. On the left is a folder tree with categories like 'demos'. The main area displays a table of pages with columns for Name, Menu, Status, Mod. User, and Mod. Date. A red arrow points to the 'remote-widget' page, which has a menu count of 4. A context menu is open over this page, listing options such as 'Open (Preview)', 'Page Properties', 'View Statistics', 'Unpublish', 'Add To Bundle', 'Mark for Copy', 'Cut', and 'Close'.

Name	Menu	Status	Mod. User	Mod. Date
news-details-ng-comments			Admin User	04/14/2015 08:38:50 PM
content-geolocation	5		Admin User	03/09/2015 06:34:06 PM
remote-widget	4		Admin User	02/11/2015 08:34:12 PM
rest-content-save	2		Admin User	02/10/2015 01:40:18 PM
One-Pagers	3		Admin User	02/05/2015 02:41:50 AM
containers			Admin User	02/03/2015 04:06:11 AM
form-success			Admin User	02/03/2015 04:05:23 AM
mobile-apps	1		Admin User	02/03/2015 04:05:07 AM

From either the folder tree or the detail area you can **right-click on a Page** to display the following options:

- **Open (Preview)** - opens the Page in Edit Mode
- **Page Properties** - allows editing of the Page properties: title, URL, template, permissions, etc.
- **View Statistics** - displays statistical data concerning front end user traffic to the HTML page selected
- **Publish/Republish** - forces modifications to display on the “live” front-end Page
- **Push Publish**- adds the folder or object to the push publishing queue - *Not used on our site*
- **Add To Bundle** - adds the page to a Bundle for push publishing - *Not used on our site*
- **Publish** - publishes a saved or draft copy of a Page or asset
- **Unpublish** - forces the Page into a draft state in which the Page will be no longer visible from the live site
- **Unlock** - unlocks a previously locked page or asset
- **Archive**- removes the Page from the content repository to be picked up for final deletion by administrative cleanup tasks
- **Copy** - copies the Page and its properties so that a duplicate can be pasted in another folder or the root folder of a host.(does not make a copy of content linked to Page)
- **Cut** - allows the Page to be transferred or “pasted” into another folder. If the paste option is not chosen, the Page and will remain in the current folder
